

SORORITY HOUSE CHOOSES elfa[®] FOR FINISH-OUT IN CLOSETS

Our company was brought into this project once it was realized that no real thought had been given to the interior of the closets!

This house was designed to house 48 girls at capacity with 2 girls per room. The 9' wide closets are designed as shared closets between two girls. elfa[®] recommended the two designs below (left). Because the girls would have ample drawer space within the room, it was determined that the main need was long and short hang in the closet, no shelves at this time.

elfa[®] shelving was utilized in other storage closets, cook book storage in the kitchen and laundry rooms.

4 ft closet with double hang

4 ft closet with double hang and 3 shelves

Resource closet in pledge study room

One of several student storage closets

Archive closet for chapter materials
