

elfa[®] Surgery Center

A surgery center needs consistency, organization and efficiency as doctors, nurses and staff move from one OR to another. elfa[®] can be cut to fit any wall, nook or cranny to insure reliability from one OR to the next, regardless of layout.

Often, supplies around the sink are stored... on the sink. A simple shelf solution above the sink contributes to organization and cleanliness.

elfa[®] works around existing millwork, carts and equipment

This facility installed a stereo system in each OR - the elfa[®] shelving provides an area to park CD's or ipods.
